EDUCATION

SMU Cox School of Business, Dallas, United States - *Masters, Business Analytics*
RNS Institute of Technology, Bengaluru, India - *B.Tech, Mechanical Engineering*

May 2025
June 2023

EXPERIENCE

Analytics Consultant (Graduate), Southern Methodist University, Dallas, TX

Aug 2025 – May 2026

- Developed instructional materials and led analytics support sessions in Python, SQL, and data science to help students strengthen technical skills and apply analytics concepts to real-world scenarios
- Consulted with student teams through the entire project lifecycle scoping analytics problems, designing methodologies, conducting data analysis, and translating insights into actionable recommendations.
- Collaborated with industry partners and faculty to align project objectives, establish clear deliverables, and ensure successful execution of multiple real-world analytics projects.

Business Analyst Intern, Datyca Inc., Woburn, MA(Remote)

Aug 2025 – Feb 2026

- Analyzed healthcare clinical and claims datasets using SQL and dashboards, improving KPI visibility, agreement level tracking, and decision support for product and client reporting.
- Streamlined web application workflows and data documentation, improving cross-functional coordination and operational efficiency across multiple business processes.
- Created data-driven presentations and reporting collateral, clarifying metrics, trends, and service-level expectations to strengthen stakeholder alignment and adoption.

Capstone Project Analyst, Neuro-Insight, Dallas TX

Jan 2025 - May 2025

- Engineered a multi-stage machine learning pipeline using Random Forest and XGBoost to predict emotional direction from 22 EEG time-series features, delivering actionable insights for creative and business strategy teams.
- Developed an interactive R Shiny application enabling non-technical stakeholders to explore emotion predictions, translating complex models into business-ready decision support tools.

Fouress Engineering (India) Pvt Ltd – Analytics Engineer

Aug 2023 - Aug 2024

- Built Excel-based cost optimization and forecasting models (VBA, macros) integrating procurement, inventory, supplier, and pricing data, improving pricing accuracy by 15% and reducing business risk by 20%.
- Automated and standardized estimation workflows using historical pricing trends and modular data models, cutting manual effort by 30%, accelerating quote turnaround, and improving delivery predictability.
- Drove cross-functional pricing strategy by integrating competitive intelligence and customer analytics, reducing order clarifications by 20% and supporting profitability, retention, and high-value contract wins.

SKILLS

Programming & Analytics: Python, SQL, R, Excel VBA, DAX, Statistical Modeling, Forecasting, A/B Testing

BI & Visualization: Power BI, Tableau, Excel, Dashboards, KPI Tracking, Data Storytelling

Cloud & Data Platforms: Azure Data Factory, Microsoft Fabric, Azure ML, Azure Functions, Azure DevOps

Data Engineering: ELT Pipelines, Data Modeling, ETL Pipelines, Data Integration, Data Transformation, Workflow Automation

Collaboration & Tools: Agile, Stakeholder Management, Git, GitHub, JIRA, Power Query

PROJECTS

Cloud BI Pipeline & Reporting System with Azure, Fabric & Power BI

- Designed and deployed end-to-end ETL pipelines using Azure Data Factory and Microsoft Fabric, implementing star schema modeling, incremental loads, and optimized transformations to support scalable, governance-ready analytics.
- Built executive Power BI dashboards using advanced DAX, delivering timely, data-driven insights to senior leadership for operational and strategic decision-making.

American Airlines Repairable Parts Forecasting (Case Competition)

- Developed a time-series forecasting model improving demand prediction accuracy by 25%, supporting inventory planning and minimizing operational downtime.
- Delivered insights via Power BI, enabling stakeholders to assess optimization opportunities in inventory and supply planning.

Financial Portfolio Management Dashboard (Mellon)

- Designed a normalized MySQL relational database with full CRUD functionality, ensuring data integrity and secure portfolio management.
- Implemented a LLM chat bot to SQL assistant, significantly improving analytics accessibility for non-technical users.
